

- The “Euroflex” buckets are strong, lightweight, practical and easy to handle
- They will not dent or rust unlike tinplate and they will not break like glass
- The “Euroflex” bucket has a protective shoulder to prevent the lid from lifting off when filled product is palletised and transported
- Optimal material usage and improved pallet utilisation
- They have increased rigidity prior to lidding for enhanced hot fill properties
- The “Euroflex” has a tamper evident feature for added security
