

Introducing our new bale arm container which is compatible with the existing crates used by major retailers and their suppliers. The Irish box company have enhanced the design to reduce product damage in transit and reduce the cost of ownership.

The new smooth and slightly waved base of the bale arm container reduces product damage through less movement whilst in transit.

The base also improves airflow as the slight wave enables air to circulate in the base of the crate. When packed goods are loaded in the crate the waved base holds part of the rigid packaging above the perforations. Instead of the packaging sealing the perforations in the base of the crate the air is allowed to circulate moving around all the product.

The waved base additionally increases the rigidity improving the handling of the product in both manual and automated systems.

The tray has comfortable handles on the short sides but it can also be carried by using the bale arms. It is provided with marking areas on the long side and label holders on each short side. A pimped surface prevents sticking of sticky labels.

The new tray is well prepared for future requirements: barcodes/or RFID tags can be integrated in the container by using the in mould labelling technology.

SPECIFICATION

Strong bale arm construction

Secure Stacking

Nesting to 70%

Part No:	IBC604020
External Dimension in mm:	600 x 400 x 199
Internal dimension in mm:	545 x 345 x 177
Usable internal height in mm:	170mm
Usable internal volume in ltr:	32 L
Weight in Kg:	1.7kg
Load capacity in kg:	15kg
Max.Static load in kg:	165kg
Max.dynamic load in kg:	165kg
Material:	PP
Temperature range	-20 to 40°C
Standard colour:	Black 930
Type of sides:	Perforated
Type of base:	Perforated
Incremental height when stacked:	185
Incremental height when nested:	50
Nesting ratio:	1:4,1 73%
LKW 80m	5850 nested, 1560 stacked

NEW PRODUCE TRAY LAUNCHED

The new 45 litre produce tray offers a reusable packaging solution for the distribution of ambient, fresh and frozen produce including loose fruit & vegetables, pre-packed foods and sundry goods.

Trays securely stack when loaded with anti-slip bars preventing trays from sliding and side ribbing further restricts movement during transportation. Trays nest 65m high when empty, saving valuable space on return transport.

Designed to fit and function with existing produce trays on the market, it is fully compatible with automated handling and washing equipment. The 600 x 400 allows the tray to stack five per layer on a 1200 x 1000mm pallet and four layers on a 1200 x 800mm pallet.

The features a specially designed push-out label holders. A pin-dot finish on the side allows removal of adhesive labels without leaving sticky residue. Your company logo can also be embossed on sides-helping to promote your business, prove ownership of the tray and prevent theft.

Ideal for use in fridges and freezers the tray can withstand temperatures down to -8C and includes ventilation sides to promote airflow and wide-width handholds that are easily picked up by hand.

Ref: IBC 16445

Manufactured in UV stabilised
polypropylene with glass filled polyamide

Stacking bars.

Capacity: 45 Litres

Dimension: 600 x 400 x 253mm (nominal)

Internal dimension: 541 x 345 x 227mm

Nested height: 65mm

Weight: 1.95kg

Maximum load: 154kg
