

Irish **Box** Company

- The “R” range of sturdy and attractively proportioned plastic boxes is ideal for the salad, delicatessen and ice cream markets. When designing the range our research identified a number of key benefits which had to be offered to satisfy these diverse market’s stringent demands. The result is the range with the winning combination of aesthetics, space efficiency and superior functionality
- The “R” range containers are manufactured from natural pigmented polypropylene with natural low density polyethylene lids. The translucent body provides excellent contact clarity when filled and the lid design, incorporating an attractive plug-fit closure, provides an excellent seal time again yet may be removed quickly and simply via the small curled lip. A further benefit is that, once filled, the container and lid design provide an inherently strong pack with improved top loading strength. In fact, stacking filled containers on top of one another actually strengthens the seal and minimises the risk of damage to contents
- There are four products in the “R” range. The 1.25 litre, 2.4 litre, 2.5 litre and 4 litre. Space efficiency, safety, optimum design results and tamper evident lid to the 2.4 and the 4 litre in a range that’s hard to beat

container size	dimensions			number per box	est. qty per pallet
	h	w/dia	d		
1.25 litre	79	178	124	768	1536
2.4 litre	98.8	179.6	179.6	315	630
2.5 litre	90	256	161	144	2160
4 litre	173.8	179.6	179.6	270	540
lid details	number per box	capacity		net volume to underside of lid	
1.25 litre	800	1.25 litre		1170ml	
2.4 litre	480	2.4 litre		2400ml	
2.5 litre	200	2.5 litre		2350ml	
4 litre	480	4 litre		4200ml	
container	weight	lid weight	stackability		
1.25 litre	45g	23g	empty containers should not be stacked more than 3 pallets high.		
2.4 litre	56g	27g			
2.5 litre	74g	38g			
4 litre	117g	27g
